

Optical Wave Service

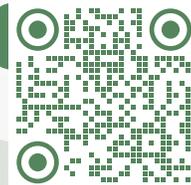

Scalable DWDM channels. SLA-backed. 24x7 NOC monitoring.

Navigate high-capacity challenges with Wave Network Services. Benefit from dedicated lambdas for data isolation, ultra-low latency, and flexible channel capacities. As data requirements evolve, Wave Services are up to the task. Continuous monitoring and swift issue resolution are standard, thanks to our 24x7 NOC and local technicians.

Speeds

10Gbps
100Gbps

Features:

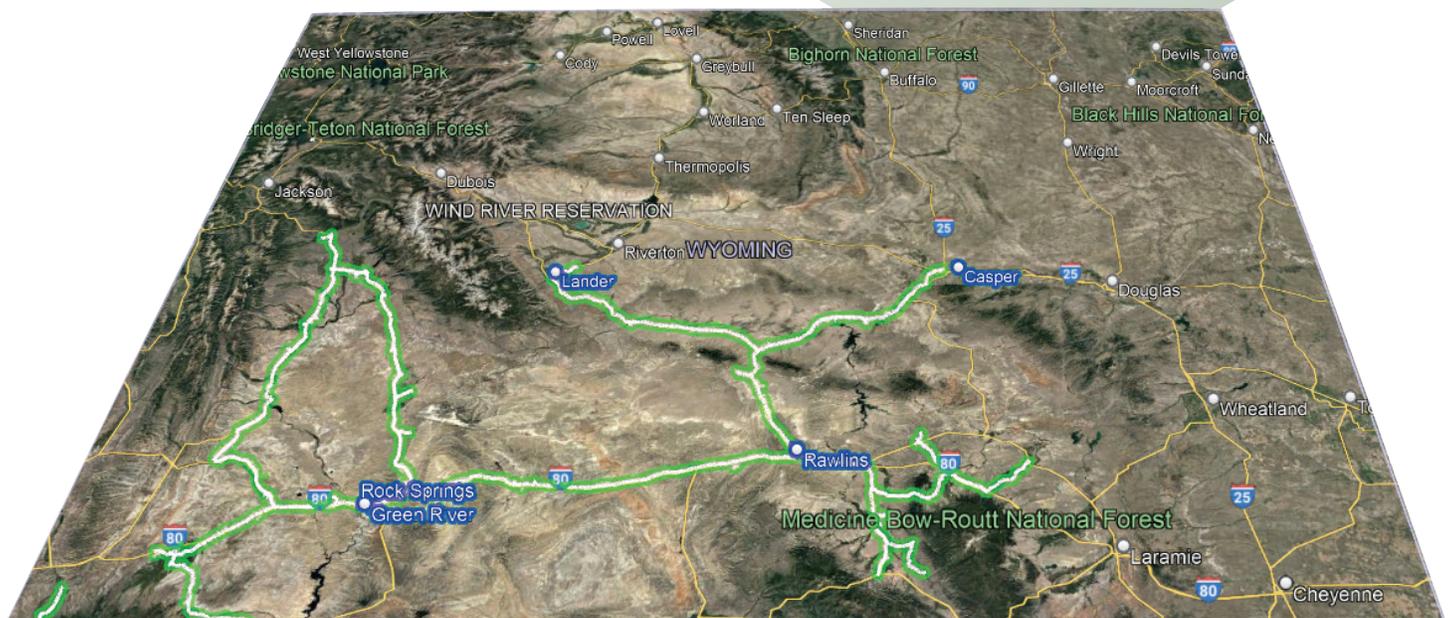

- Wavelengths are flexible and scalable based on customer needs.
- Waves are private line circuits dedicated to one customer.
- Ideal for customers needing high security and extremely low latency.
- Dedicated bandwidth at full line rate.
- Available speeds include 10Gbps and 100Gbps.
- Carrier-Class Service Level Agreement (SLA).
- 24/7 network surveillance and monitoring - Our Network Operations Center (NOC) is located and staffed in Wyoming, providing 24/7/365 monitored support.

Tailored for sectors requiring high capacity and low latency such as:

- **Telemedicine**
- **Real-time analytics**
- **SAN**

- **Disaster Recovery**
- **Real-time data replication**
- **Long haul transport**

Available in select areas across Union's Fiber network
